- I worked here as a Web Developer for 1 year and 2 months. My main task revolves around Backend and Frontend Web Development. The technologies I use in Backend Development is Laravel 8/9, while I use HTML, CSS, Bootstrap, Javascript, JQuery, Vue.JS, Livewire, Tailwind, Jetstream for the Frontend. I use MySQL for the databases of the website I create in this company.

Aspire Outsourcing Solutions

BGC Taguig,
Philippines
09/2020– 02/2022

Software Engineer

- I worked here as a Software Engineer for almost 2 years. My job mainly revolves around development of APIs which are being used by the mobile developers. There are also instances where they assign me tasks which are related to Web Development. The technologies I used for the backend is Laravel 7 and sometimes Lumen. For the frontend, I use HTML, CSS, Bootstrap, Javascript, JQuery and sometimes Vue.JS. I always use MySQL for the database in this company.

Dynamic Markups

Cavite City,
Philippines

Web Developer

08/2019 – 09/2020

- I worked here as a Backend Web Developer at this company. Most of the task revolves around economical transactions, meaning it is about money. My job is technically Fullstack since I work both in backend and frontend. The technologies I used for backend are PHP and sometimes Laravel. While in the front end I use HTML, CSS, Bootstrap, Javascript, JQuery and Axios. For the database, I always use MySQL.

Freelance Developer

Web Developer

2017 – Present

- I also do freelance web development since 2017 on various platforms and sometimes through connections. I did various type of websites but most of it are e-commerce and informational websites. I also created kiosk. The technologies I used in backend are PHP and Laravel. While for the front end I use HTML, CSS, Bootstrap, Javascript, JQuery, and sometime Vue.JS. For the database of the website, I always use MySQL.
